

 OCEANIS

About us

The numerous relationships and partnerships that our three branches bring, give us the ability to cover all aspects of stone for our clients. The secret of our success is the commitment we all feel towards Oceanis and the way we work together as a team. Our expectations are high, and we have the confidence to communicate the skills we can offer. The Oceanis team play a key part in bringing a successful outcome to every business opportunity it develops.

We value the relationships within our group and those we develop with our client. We believe in openness and honesty which builds trust as we work through projects together. The strongest work connections come through a process of professional conflicts and positive challenges across our industry. A successful business comes with hard work, determination and strong communication throughout.

We understand our client's needs, no matter how large or small the project may be. Guiding them to the right conclusions and focusing on solutions to complete the project to their complete satisfaction.

Oceanis Projects operate closely with architects, designers, and major contractors from the very start of each project through to completion. We source well trained and experienced stonemasons and fixers who work under the direct supervision of our site managers. They work as part of a strongly dedicated team to ensure that we are completing projects and sticking to site schedules. We can provide a large range of materials – from mass produced to unique, budget to premium – to meet every one of our client's specifications.

Oceanis will always aim to provide the top level of service, combined with the most competitive prices. We work directly with our partners to import and manufacture, allowing us to offer the highest level of service at every level and cater for a wide variety of projects

Chief Executive Officer
Oceanis Group

Oceanis Group is a leading name in the stone industry, combining the strengths of our subsidiaries, Pisani and Medusa Stone, to deliver comprehensive stone solutions for discerning clients. With our global reach and network of trusted suppliers, we ensure the finest selection of natural materials, each carefully vetted for quality, uniqueness, and durability. From initial consultation to final installation, Oceanis Group oversees projects with a focus on precision, aesthetics, and sustainability, serving as a partner at every stage.

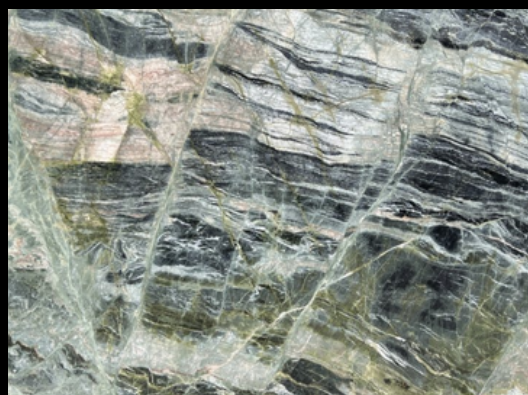

Pisani is our trusted arm for sourcing an impressive range of stone materials, from marbles and granites to onyx, limestones, and more. Leveraging decades of experience, Pisani ensures that our clients have access to the very best stones, hand-selected from quarries around the world. Whether for kitchens, bathrooms, feature walls, or exteriors, Pisani delivers materials that elevate spaces and meet the high standards of today's luxury market.

Medusa Stone is the South East's leading specialist for the templating, fabrication, and installation of stone worktops and tiles. With over 20 years of expertise, Medusa Stone brings precision craftsmanship to every project, transforming raw stone into refined surfaces for kitchens, bathrooms, and beyond. Our Basildon showroom provides clients with an immersive selection experience, allowing them to explore options and envision their project before it begins.

Quartzite

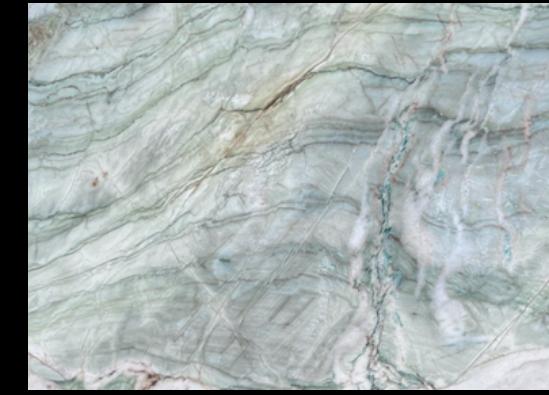

Quartzite is a stunning, durable metamorphic rock, perfect for creating sophisticated and long-lasting surfaces. Its natural beauty, combined with its impressive strength, makes it an ideal choice for worktops, flooring, and feature walls.

Quartzite has the appearance of marble but with the durability of granite, making it a sought-after material for those looking for luxury with practicality. Available in a range of soft earthy tones, to striking bold colours, quartzite complements any design style.

Applications

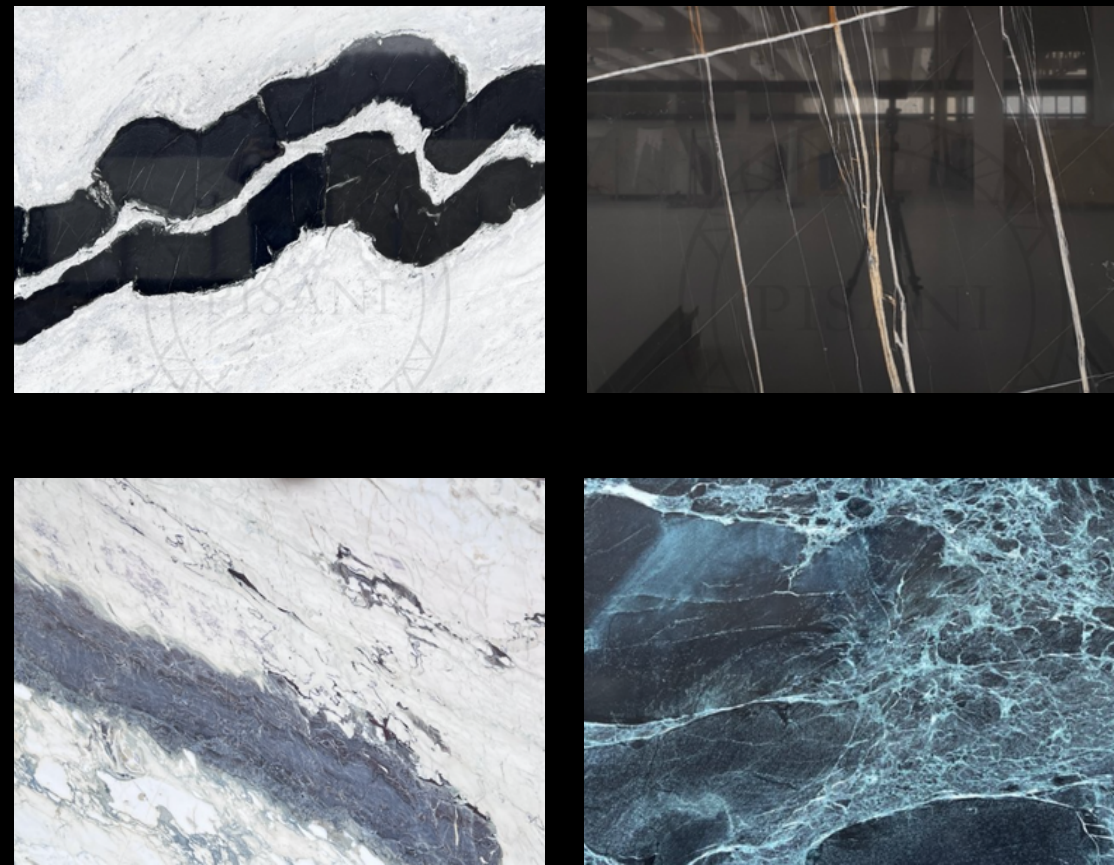

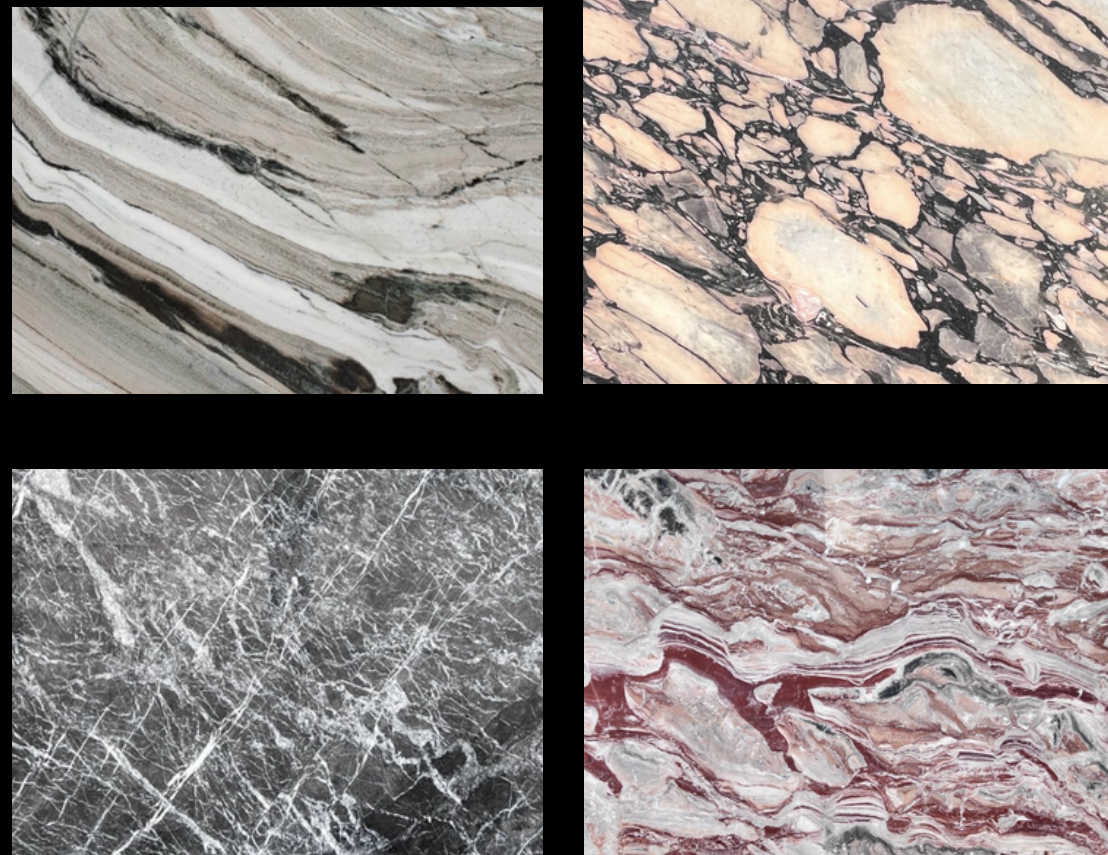

With its high resistance to heat, scratches, and stains, quartzite is a functional and attractive choice for kitchens and bathrooms. Each slab features unique veining and patterns, adding an individual touch to your project.

Whether used for worktops, flooring, or as a statement feature wall, quartzite delivers both visual appeal and superior durability. It is a long-lasting investment, ideal for creating standout surfaces that will continue to impress.

Marble

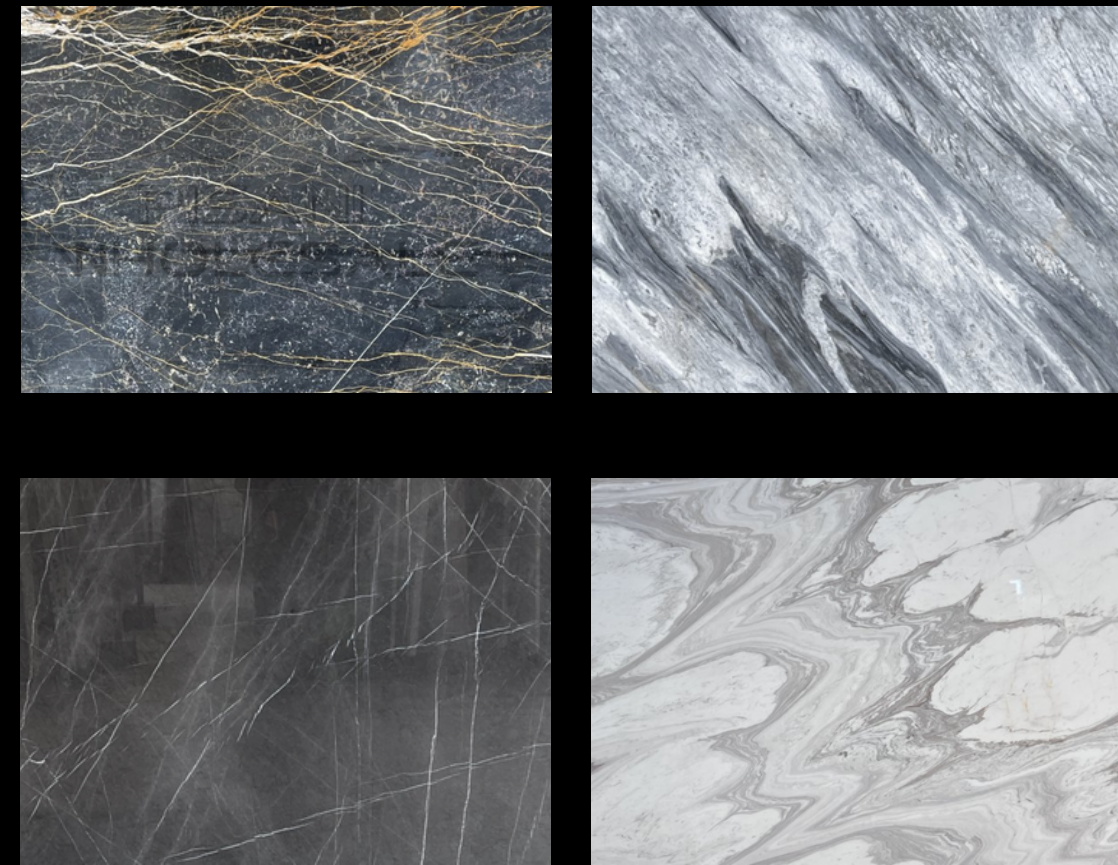

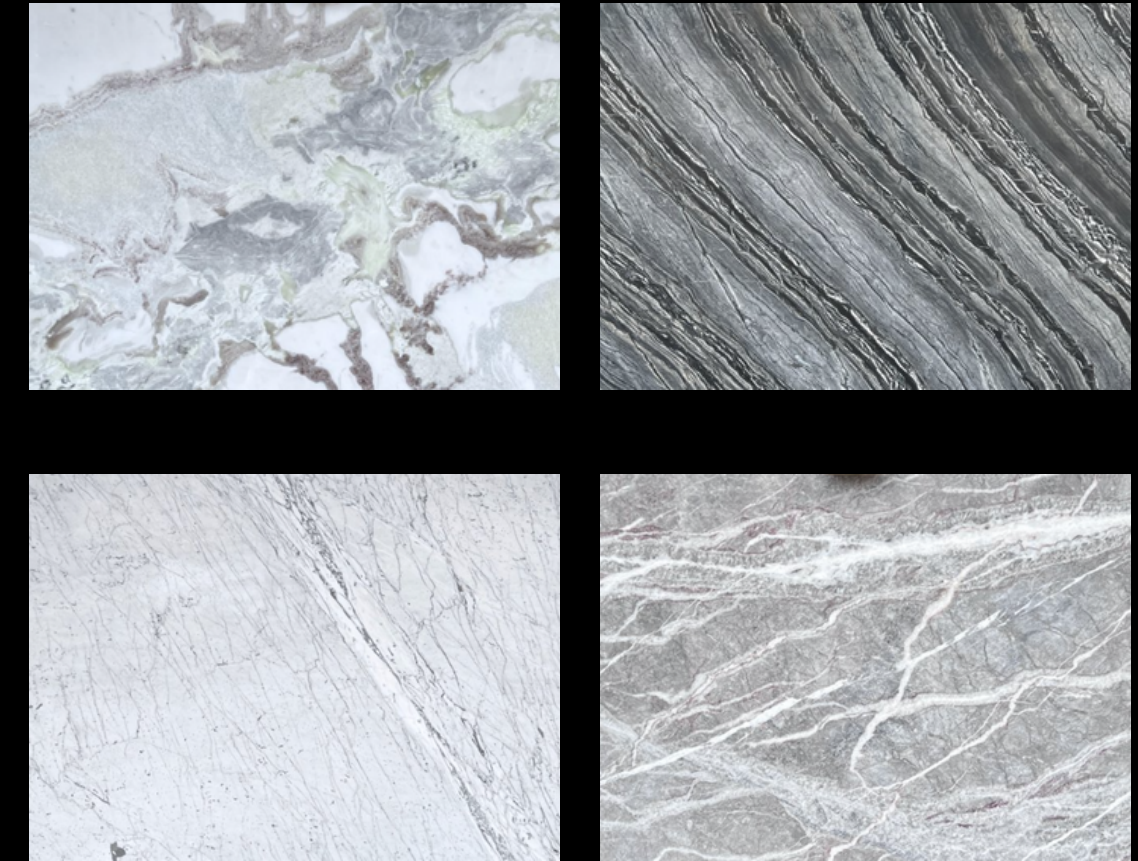

Marble is renowned for its timeless beauty and luxurious appeal, making it a top choice for both residential and commercial projects.

Available in a wide range of colours and patterns, marble offers natural elegance that can elevate any space.

Applications

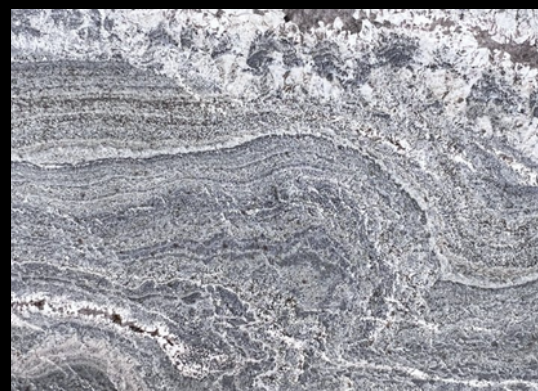

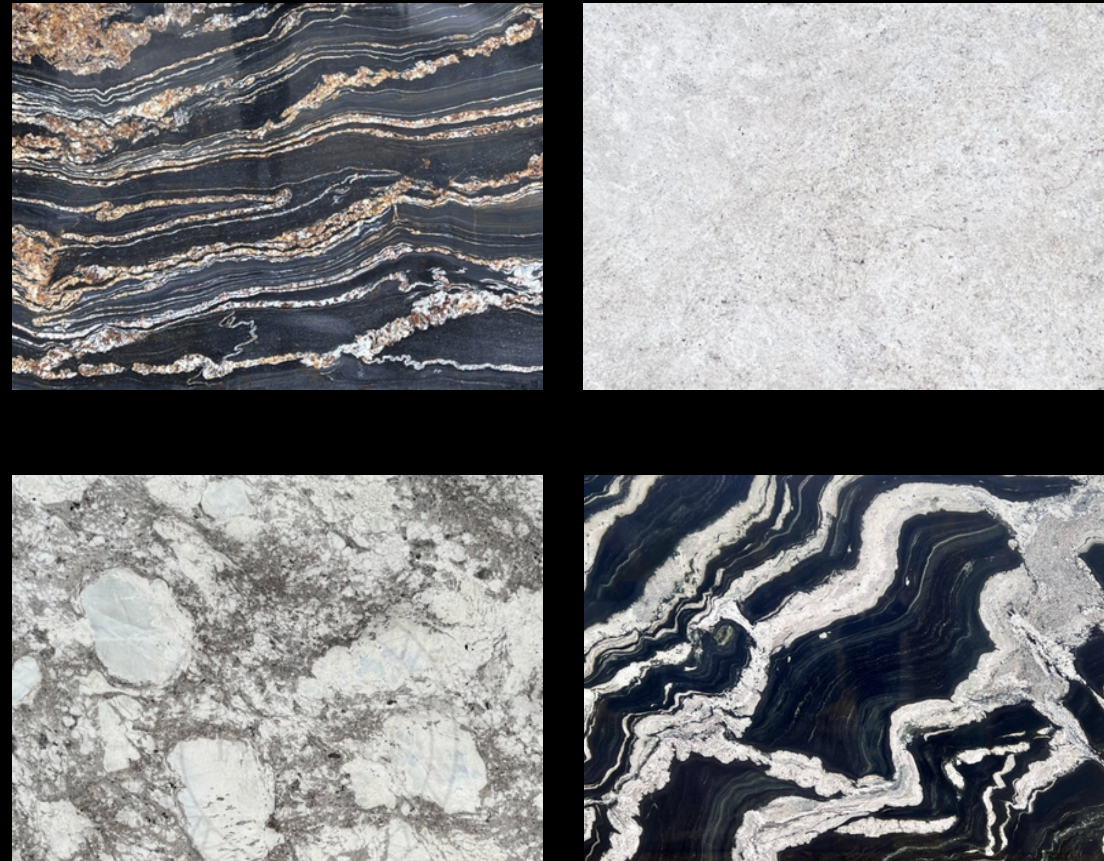

Marble is a versatile stone that adds elegance to various applications. Its opulence makes it a popular choice for kitchen worktops, vanities, and fireplace surrounds. The natural veining and polished finish create a classy look in modern and classic designs.

Marble is also ideal for flooring, feature walls, and decorative accents, offering timeless beauty to any room. With its durability and heat-resistant properties, marble is a functional yet stunning choice for any project.

Granite

Granite is a highly durable and versatile natural stone, making it a popular choice for both residential and commercial projects. With its striking patterns and a wide range of colours, granite works beautifully in kitchens, bathrooms, and outdoor spaces.

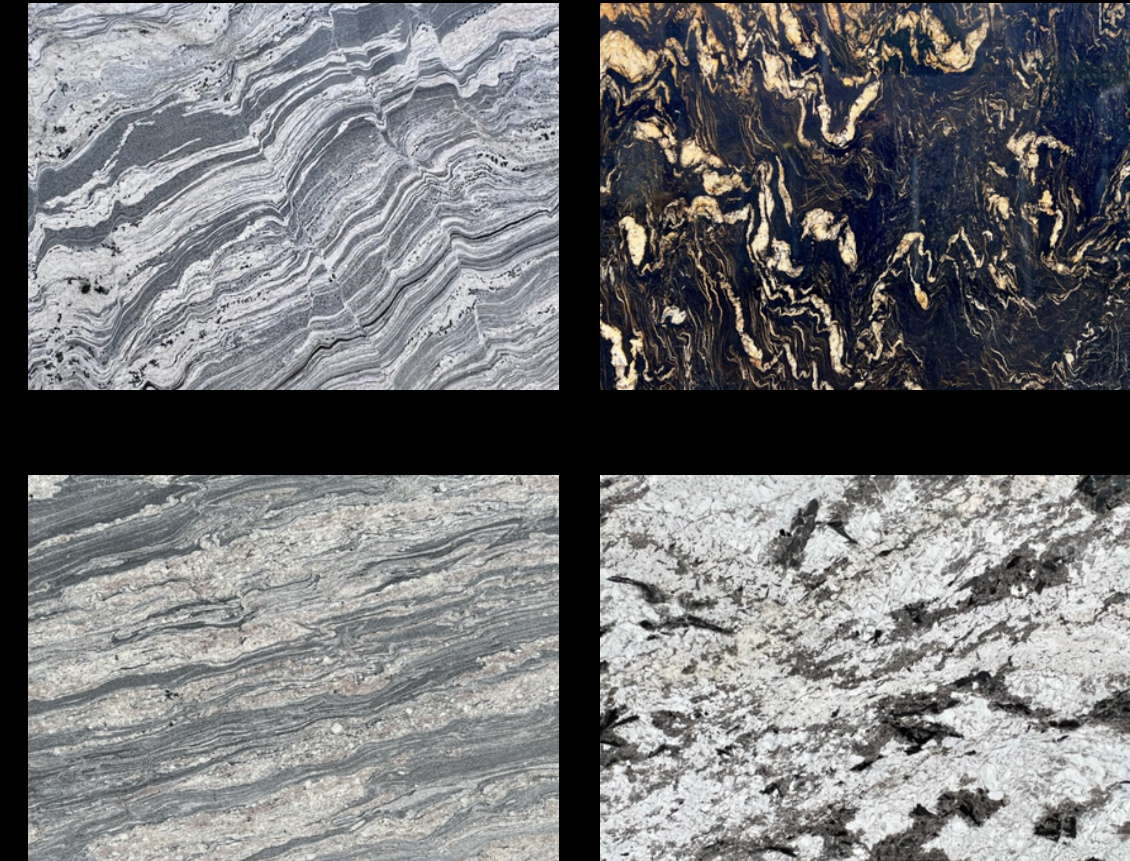

Known for its resistance to scratches, stains, and heat, granite is an ideal material for highly used areas and surfaces that endure daily use.

Whether for worktops, flooring, or wall cladding, granite adds both beauty and functionality to any design.

Applications

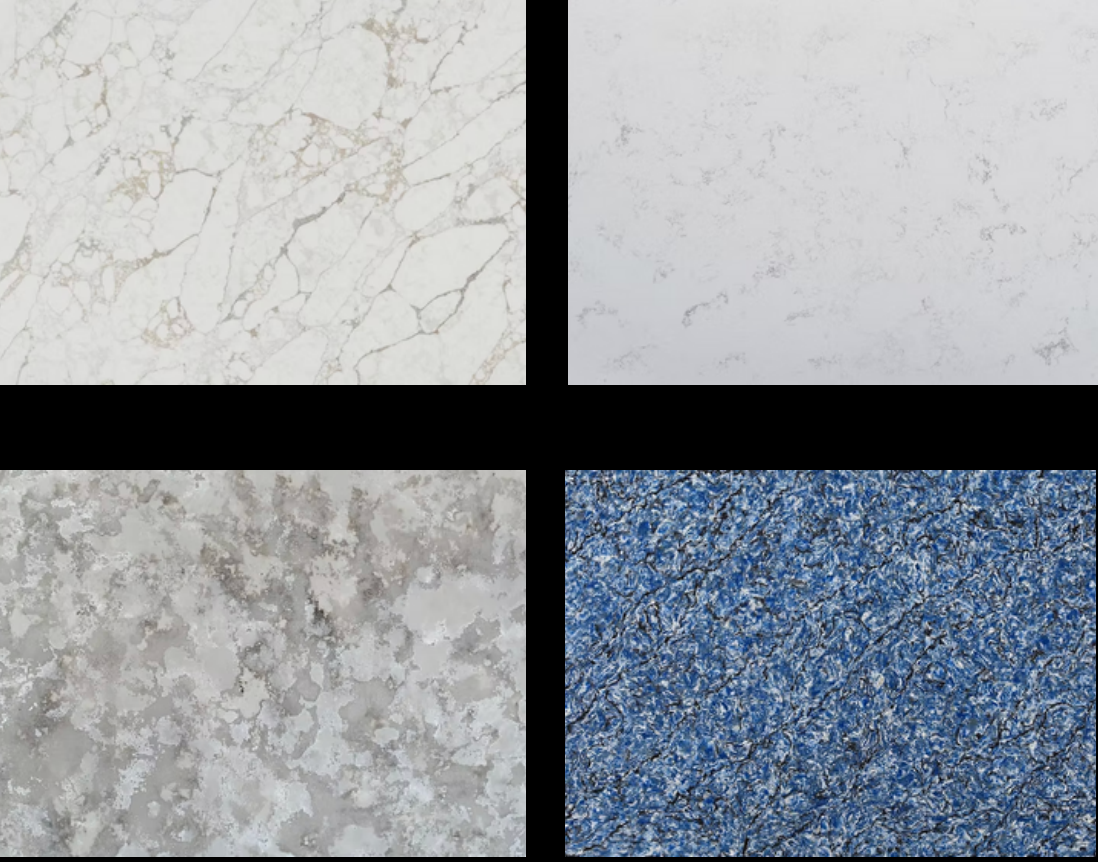

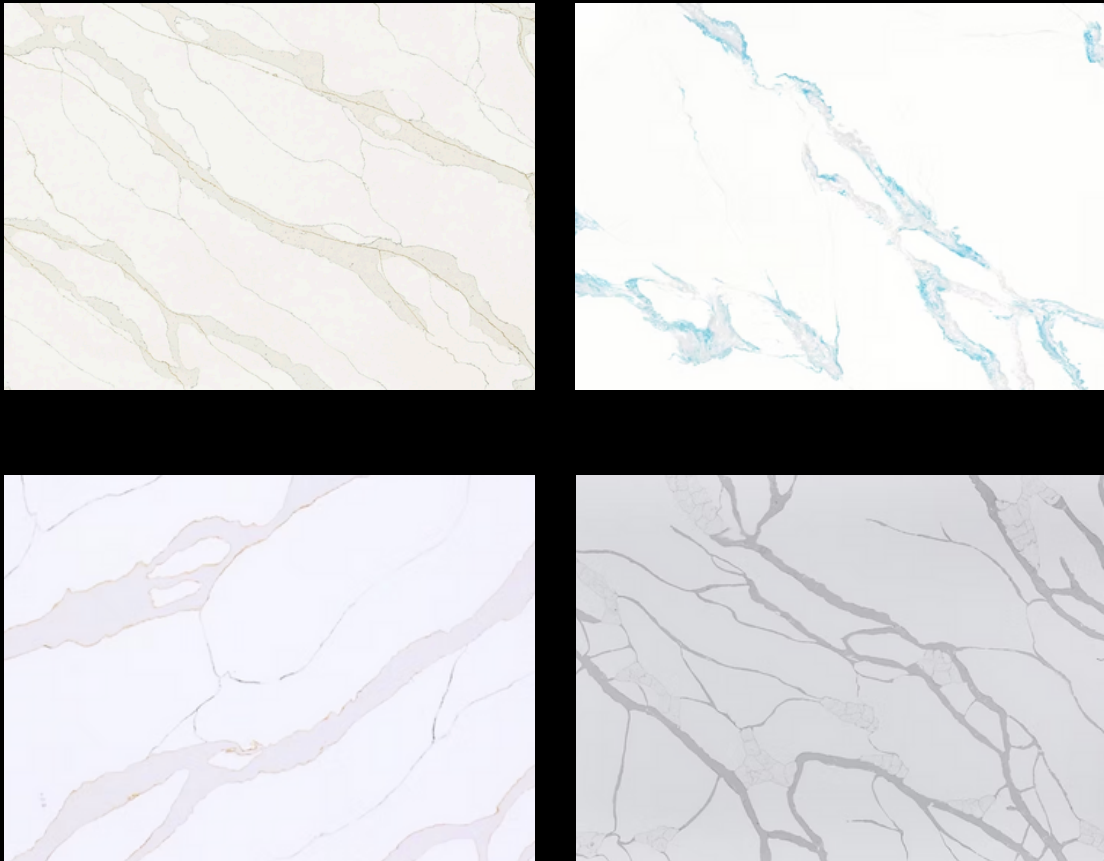

Granite's natural strength ensures long-lasting performance in even the busiest of environments. Each slab is unique, with intricate veining and speckles that bring character to any project.

Granite's natural resilience to heat and scratching makes it perfect for busy kitchens, bathrooms and any outdoor projects. Whether used for large surfaces or smaller feature areas, granite will continue to provide both style and substance in your home or commercial space for years to come.

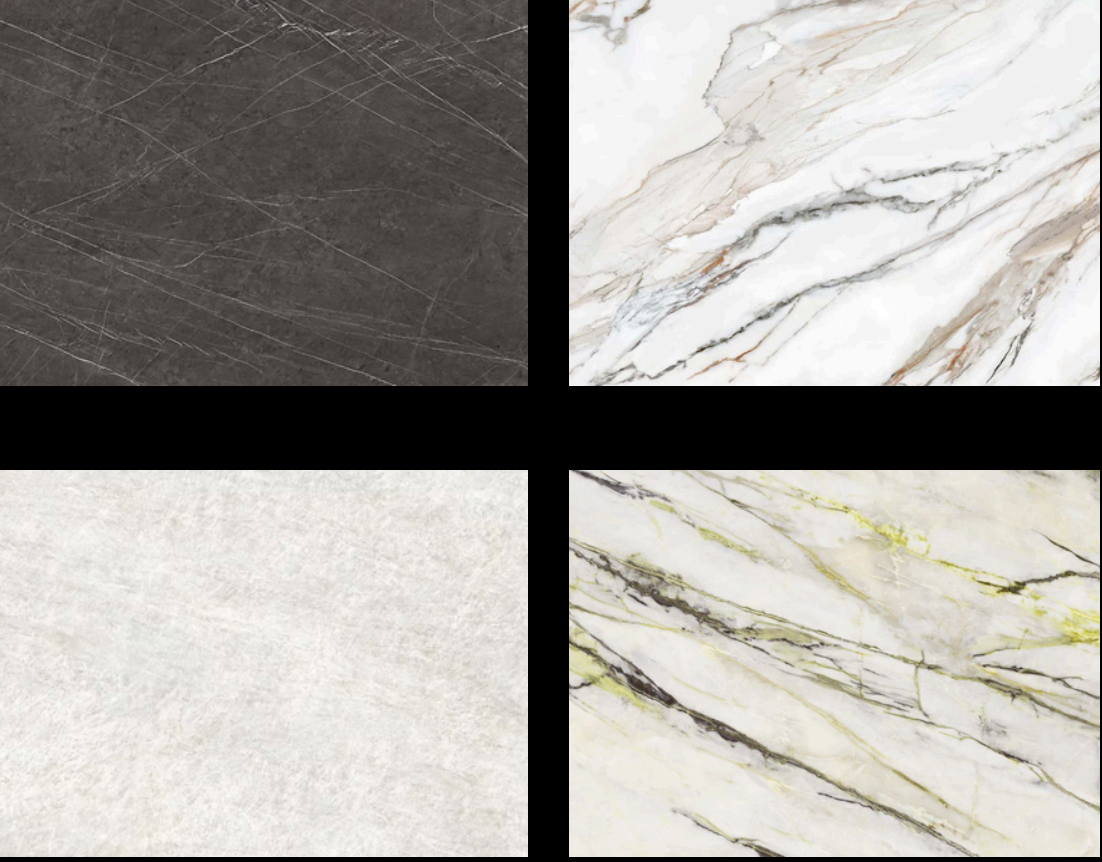

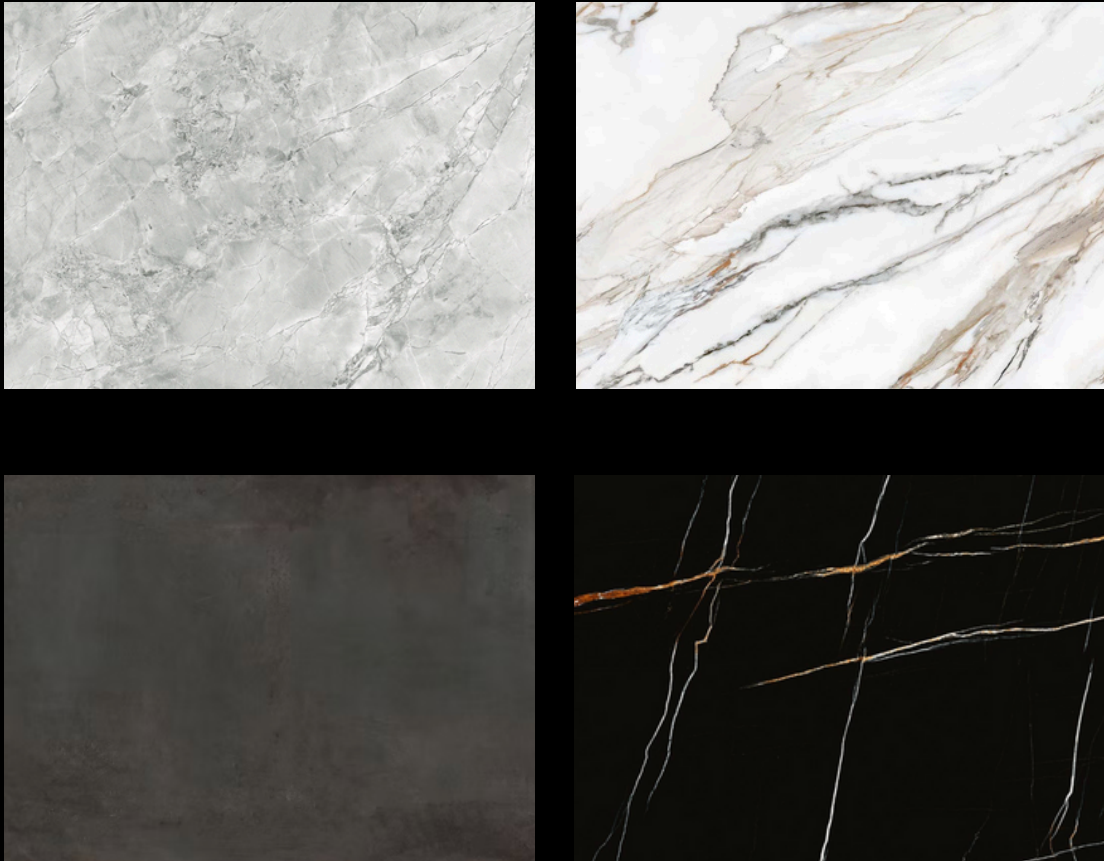

Engineered Stone

Quartz and porcelain are engineered materials that offer both exceptional durability and a broad range of design possibilities. Quartz surfaces are made from crushed natural stone combined with resin, resulting in a durable material perfect for worktops, vanities, and backsplashes.

Available in a wide range of colours and patterns, quartz replicates the look of natural stone while offering some resistance to stains, scratches, and moisture.

Porcelain is equally versatile with uses ranging from flooring to wall coverings. It is non-porous, making it resistant to stains, bacteria, and water, and is available in a variety of finishes that mimic the appearance of marble, stone, or wood.

Both quartz and porcelain are low-maintenance, eco-friendly materials that combine form and function, offering a wide range of design possibilities for both residential and commercial spaces.

Project Eighty Nine

It was our privilege to be involved in Project Eighty Nine, an exclusive residential development in prime Central London, designed by Rigby & Rigby. Our team sourced, supplied, and fitted the stone elements that played a key role in bringing this luxurious, sustainable home to life.

SBID Award Winners

Project Eighty Nine went on to win the SBID Award for Ultra-Luxury Residential Property – UK in 2024, and we are incredibly proud to have been a part of this award-winning project.

The SBID interior design awards is an international celebration of professional excellence across the design industry, with a global reputation.

Project Gallery

Bespoke Pieces

In addition to larger installations, we also specialise in smaller, bespoke projects such as crafted fireplace surround, a backlit feature, or a custom-designed niche, that bring unique style and elegance to any space.
